

## CONTENTS

<b>Topic 1. Introduction to Microeconomics</b>	6
1 Place, boundaries, logic and tools of microeconomics. Subject of microeconomics.	6
2 Fundamental issues of microeconomics and their solution at the micro level	8
3 Features of the methodology of microeconomics	10
Key concepts	11
<b>Topic 2. Theory of consumer behavior</b>	12
1 The problem of assessing the Utility of goods in Cardinalism and Ordinalism	12
2 Axioms of Ordinalism. Indifference curve. Indifference map	14
3 Buyer's budget line. Consumer Equilibrium in Ordinalism	16
4 Income-Consumption, Price-Consumption Curves	18
5 Market Demand and construction of the Market Demand Curve	20
Key concepts	21
<b>Topic 3. Market Behavior of Competitive Firms</b>	22
1 Types of Competition and Basic Market Structures. Two methods of analyzing Market Structures	22
2 Perfect Competition and its main features	27
3 Short Run equilibrium of a Perfectly Competitive Firm. Supply Curve of a Competitive Firm	30
4 Long Run equilibrium of a Perfectly Competitive Firm	31
5 Evaluation of the effectiveness of Perfect Competition	34
Key concepts	35
<b>Topic 4. Pure Monopoly</b>	36
1 Main features of a Pure Monopoly. Types of monopoly	36
2 Price and Output Determination under Pure Monopoly	37
3 Economic consequences of Monopoly	39
4 Price discrimination: conditions, forms, consequences	41
5 Regulated Monopoly	44
6 Evaluation of the effectiveness of Pure Monopoly	46
Key concepts	48
<b>Topic 5. Monopolistic competition</b>	49
1 Main features of Monopolistic Competition	49
2 Short Run equilibrium of a firm under Monopolistic Competition	50
3 Long Run equilibrium of a firm under Monopolistic Competition	52
4 Non-price competition and its costs	54
5 Evaluation of the effectiveness of Monopolistic Competition	55

Key concepts	56
<b>Topic 6. Oligopoly</b>	57
1 Main features of Oligopoly	57
2 Typology of Oligopoly models	58
3 Kinked Demand Curve model of Oligopoly	60
4 Indicators of monopoly power and Antitrust Legislation	61
5 Evaluation of the effectiveness of Oligopoly	64
Key concepts	65
<b>Topic 7. Resource markets. Labor market</b>	66
1 Resource Demand: a general approach. Marginal Resource Revenue, Marginal Resource Cost	66
2 Competitive labor market model	68
3 Imperfectly Competitive labor market	70
4 Nominal and real wages. Forms and systems of wages	73
5 Human Capital Theory	75
6 Features of the labor market in the Republic of Belarus	76
Key concepts	77
<b>Topic 8. Capital market. Entrepreneurial ability and economic profit</b>	78
1 Capital market and its structure. Capital goods market	78
2 Loan capital market and loan interest. Nominal and real interest rates	80
3 Discounting future income. Net Present Value	82
4 Securities market. Prices and incomes in the securities market	83
5 Entrepreneurship. Functions and sources of profit	84
Key concepts	86
<b>Topic 9. Land market</b>	87
1 Land as a factor of production. Limited land	87
2 Land rent and its determination. Lease vs. Rent. Land price	89
3 Differential land rent based on fertility and location	90
4 Development of the Land Market in the Republic of Belarus	92
Key concepts	94
<b>Topic 10. General equilibrium and Social Welfare</b>	95
1 Partial and general equilibrium. The relationship between product and resource markets	95
2 Exchange efficiency. Indifference Curve	97
3 Production efficiency. Production Possibilities Curve	100
4 General economic equilibrium and Social Welfare	103
5 Market failure and the need for microeconomic equilibrium	104
Key concepts	105

<b>Topic 11. Theory of Externalities</b>	106
1 Public and private, positive and negative Externalities	106
2 Internalization of Externalities. The Coase theorem	108
3 Regulation of Externalities	111
4 Use of the theory of Externalities in economic practice	113
Key concepts	114
<b>Topic 12. Information, Uncertainty and Risk in economics</b>	115
1 Choice under Uncertainty. The concept of Asymmetric Information	115
2 Markets with Asymmetric Information. Adverse Selection. Types of market signals	119
3 Moral hazard. Principal-Agent Problem	121
4 Asymmetric Information as a cause of Government Microregulation	122
Key concepts	123
<b>Topic 13. Public Goods</b>	124
1 Pure Private and Pure Public Goods. Properties of Public Goods	124
2 Features of demand for Public Goods	126
3 Production of Public Goods and the Free-Rider Problem	129
4 The role of the State in ensuring the supply of Public Goods	130
Key concepts	131
<b>Topic 14. Public Choice Theory</b>	132
1 Methodology of Public Choice Analysis	132
2 Model of interaction between Politicians and Voters. Model of Bureaucracy. Political rent-seeking	133
3 Political-Economic Cycle	136
4 The Problem of the efficiency of Government intervention in the economy	138
Key concepts	138
List of recommended references	139
